Executive Summary

I am a junior software developer with skills in HTML, CSS, JavaScript and Python all of which are backed-up by a Full Stack Software Development Diploma from the Code Institute. I have worked in the arts and cultural events sector for over a decade, gaining a wealth of professional experience. In addition, I have also enhanced my IT knowledge and skills over the past few years, both for personal and professional purposes, and I am keen to further my development. I am a good communicator, a creative problem solver and a team player who is eager to enter the tech industry and join a stimulating development team where I can grow and contribute.
